

Objective:

The objective of the report is to research about the website of iDEA training courses. In this report I will try to review on the User interface and User Experience Design of the website.

Specification of auditing:

I will try to discuss that, is the user interface easy to understand. That means, at the time of browsing the website, user can easily understand that what to do with which option. I will also discuss that, is all the options work perfectly or not?

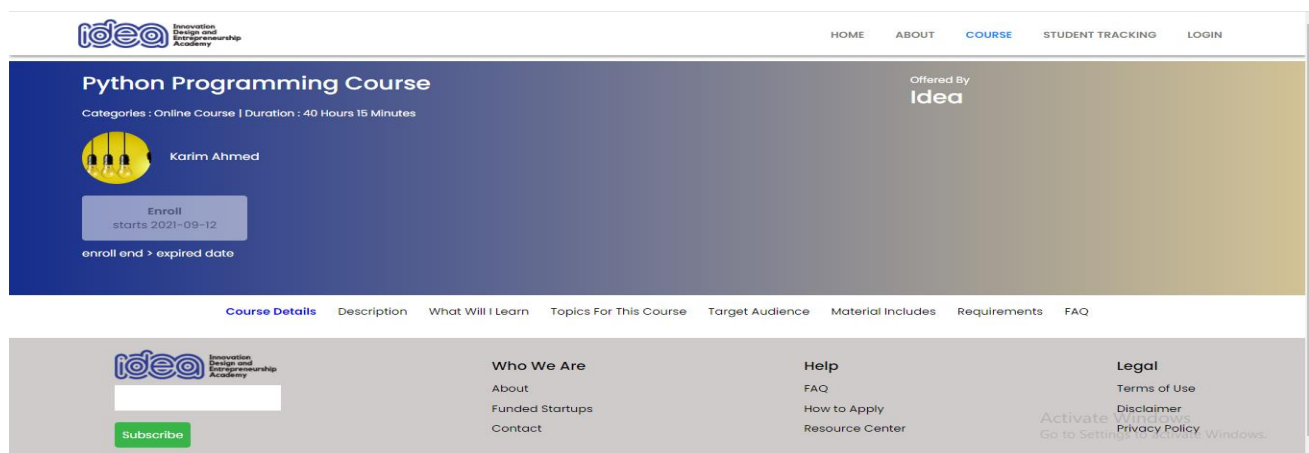

Findings:

From my research, I understood that the website has been developed by using JavaScript and CSS. I have also found that there are 4 issues in the website.

The issues are identified and described below with screenshots:

1. Obscure Application:

“Course Details” Page:

In the course details page, the purpose of the box above the subscribe button is not clear. And also, if we click on the subscribe button, it does not give any response.

2. Inaccurate Information:

“Description” Page:

Design and
Entrepreneurship
Academy

HOMEABOUTCOURSESTUDENT TRACKINGLOGIN

Access to lectures and assignments depends on your type of enrollment. If you take a course in audit mode, you will be able to see most course materials for free. To access graded assignments and to earn a Certificate, you will need to purchase the Certificate experience, during or after your audit. If you don't see the audit option: The course may not offer an audit option. You can try a Free Trial instead, or apply for Financial Aid. The course may offer 'Full Course, No Certificate' instead. This option lets you see all course materials, submit required assessments, and get a final grade. This also means

“Frequently Asked Question (FAQ)” Page:

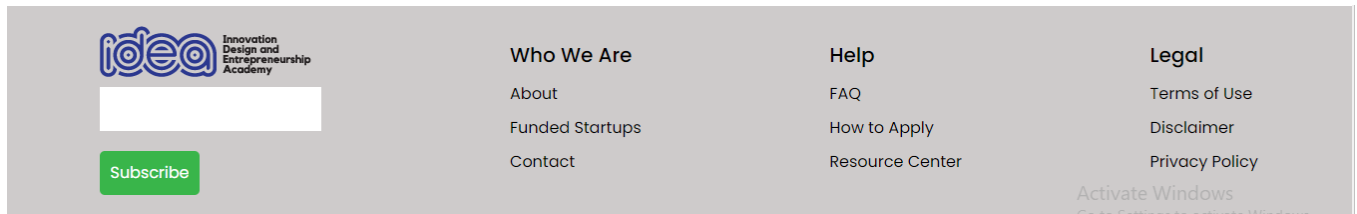

In all the pages, information is same. For example, the information of “Description” and “Requirements” pages should be different. But in the website, all the options show the same information. In the information paragraph, there is one incomplete sentence that cannot express any meaning.

1. Appearance issue:

After clicking on the options, the information appears at the top of the navigation bar. If the information will appear in the bottom of the navigation bar, then it will look better.

2. Wrong direction:

In the above field, all the options like About, Contact, FAQ, How to Apply are checked at the same destination. But the destination of each and every option should be different.

Conclusion:

According to my observation, I think the development of the website has not perfect yet. The interface of the website is not enough user friendly. But if the above-mentioned issues can be solved then the website will be effective enough.
